

sustainability and building renovation and restoration

an international conference

april 16-17, 2009

vinovo – torino, italy

conferences@sjiu.it

How do we combine the need to renovate and restore the worldwide existing and aging building stock – most of which is of cultural and historical relevance – with the introduction of innovative energy-saving and environmentally sound technologies?

SJIU Della Rovere Castle Campus
Vinovo – Torino, Italy

As a new environmental American university, St. John International University (SJIU) promotes a discussion among professionals and students in the field of architecture on an environmental and sustainable approach to architecture, as characterizes its mission. In particular, this conference is focused on the issue of developing effective solutions in reducing fossil fuel dependency and related global warming effects in the building sector.

St. John International University is proud to host this event in collaboration with:

In collaboration with the NH American Institute of Architects earn AIA Continuing Education Units on Sustainable Design while enjoying the sites and flavors of Torino, Italy!

Conference Fee is €300/\$400. Reduced student prices is €50/\$75. For more information email conferences@sjiu.it or visit www.sjiu.it
